

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of the claims in this application. In this listing claims 1, 4, 12, 15, 23, and 26 are amended, claims 34-42 are added, and claims 3, 5-11, 14, 16-22, 25, and 27-33 are cancelled.

Listing of the Claims:

1. (Currently amended) A method for providing a user with a personalized ~~web page of~~ schedule information for television-related and non-television-related events, comprising:

~~providing the user with an opportunity to select at least one desired television genre from a plurality of available television genres;~~

providing the user with an opportunity to select at least one ~~desired~~ television-related information source from a plurality of television-related information sources ~~wherein the opportunity to select the desired television genre is a separate opportunity from the opportunity to select the desired television-related information source;~~

providing the user with an opportunity to specify criteria for delivering information from the at least one selected television-related information source;

providing the user with an opportunity to select at least one ~~desired~~ non-television-related information source from a plurality of non-television-related information sources for providing schedule information for non-televised events;

providing the user with an opportunity to specify criteria for delivering schedule information from

the at least one selected non-television-related information source;

providing the user with an opportunity to select a delivery scheme from a plurality of delivery schemes for delivering the personalized schedule information;

providing generating the personalized schedule information, wherein the schedule information includes a grid of television program listings on the web page including television program times, television channels, and television program titles, wherein the television program listings in the grid are based on the selected specified criteria for delivering information from the at least one television genre and are obtained from the selected television-related information source, and wherein the schedule information includes information for non-televised events based on the specified criteria for delivering information from the at least one selected non-television-related information source; and

providing on the same web page a region of schedule information for non-televised events that includes event titles delivering the personalized schedule information to the user based on the delivery scheme selected by the user.

2. (Original) The method defined in claim 1, wherein providing the user with an opportunity to select at least one desired non-television-related information source from a plurality of non-television-related information sources comprises providing the user with an opportunity to select at least one desired non-television-related web site.

3. (Cancelled).

4. (Currently amended) The method defined in claim 3 1, wherein the plurality of delivery schemes comprises a plurality of delivery schemes selected from the group of delivery schemes consisting of: continuous delivery, e-mail, HTML mail, pager/digital phone reminder, and pager/digital phone notification.

5-11. (Cancelled)

12. (Currently amended) An on-line scheduling application system in which users are provided with a personalized ~~web page of~~ schedule information for television-related and non-television-related events, comprising:

~~means for providing the user with an opportunity to select at least one desired television genre from a plurality of available television genres;~~

means for providing the user with an opportunity to select at least one ~~desired~~ television-related information source from a plurality of television-related information sources, ~~wherein the opportunity to select the desired television genre is a separate opportunity from the opportunity to select the desired television-related information source;~~

means for providing the user with an opportunity to specify criteria for delivering information from the at least one selected television-related information source;

means for providing the user with an opportunity to select at least one ~~desired~~ non-television-related information source from a plurality of non-television-related information sources for providing schedule information for non-televised events;

means for providing the user with an opportunity to specify criteria for delivering schedule information from the at least one selected non-television-related information source;

means for providing the user with an opportunity to select a delivery scheme from a plurality of delivery schemes for delivering the personalized schedule information;

means for ~~providing~~ generating the personalized schedule information, wherein the schedule information includes a ~~grid of~~ television program listings on the web page including television program times, television channels, and television program titles, wherein the television program listings in the grid are based on the selected specified criteria for delivering information from the at least one television genre and are obtained from the selected television-related information source, and wherein the schedule information includes information for non-televised events based on the specified criteria for delivering information from the at least one selected non-television-related information source; and

means for ~~providing on the same web page a region of schedule information for non-televised events that includes event titles~~ delivering the personalized schedule information to the user based on the delivery scheme selected by the user.

13. (Original) The system defined in claim 12, wherein the means for providing the user with an opportunity to select at least one desired non-television-related information source from a plurality of non-television-related information sources comprises means for providing the user with an opportunity to

select at least one desired non-television-related web site.

14. (Cancelled)

15. (Currently amended) The system defined in claim ~~14~~ 12, wherein the plurality of delivery schemes comprises a plurality of delivery schemes selected from the group of delivery schemes consisting of: continuous delivery, e-mail, HTML mail, pager/digital phone reminder, and pager/digital phone notification.

16-22. (Cancelled)

23. (Currently amended) An on-line scheduling application system in which users are provided with a personalized ~~web page of~~ schedule information for television-related and non-television-related events, comprising:

a scheduling system comprising:

a data server configured to provide television-related and non-television-related scheduling information, wherein the television-related scheduling information includes ~~television program listings including~~ television program times, television channels, and television program titles, ~~and non-television-related schedule information~~; and

a transmission server configured to provide the information from the data server to a server for delivery ~~via the Internet in the web page~~ to the user; and

a multimedia system configured to:

~~provide the user with an opportunity to select at least one desired television genre from a plurality of available television genres;~~

provide the user with an opportunity to select at least one desired television-related information source from a plurality of television-related information sources, ~~wherein the opportunity to select the desired television genre is a separate opportunity from the opportunity to select the desired television-related information source;~~

provide the user with an opportunity to specify criteria for delivering information from the at least one selected television-related information source;

provide the user with an opportunity to select at least one desired non-television-related information source from a plurality of non-television-related information sources for providing schedule information for non-televised events;

provide the user with an opportunity to specify criteria for delivering schedule information from the at least one selected non-television-related information source;

provide the user with an opportunity to select a delivery scheme from a plurality of delivery schemes for delivering the personalized schedule information; and

~~display on the web page of~~ receive the personalized schedule information to the user,
wherein the schedule information includes a grid of the television program listings including television program times, television channels, and television program titles, wherein the television program listings in the grid are based on the selected television genre and that
are obtained by the data server from the at least one selected television-related information source based on the specified criteria for delivering information from the at least one selected television-related information

source, wherein the schedule information includes
schedule information for non-television-related events
obtained by the data server from the at least one
selected non-television-related information source based
on the specified criteria for delivering information from
the at least one selected non-television-related
information source, and wherein the schedule information
is delivered to the user based on the delivery scheme
selected by the user; and

~~display on the same web page a region~~
~~of schedule information for non-televised events that~~
~~includes event titles.~~

24. (Original) The system defined in claim 23,
wherein:

the multimedia system is further
configured to provide the user with an opportunity to
select at least one desired non-television-related web
site; and

the data server is further configured to
obtain at least a portion of the non-television-related
schedule information from the selected web site.

25. (Cancelled)

26. (Currently amended) The system defined in
claim 25 24, wherein the plurality of delivery schemes
comprises a plurality of delivery schemes selected from
the group of delivery schemes consisting of: continuous
delivery, e-mail, HTML mail, pager/digital phone
reminder, and pager/digital phone notification.

27-33. (Cancelled)

34. (New) The method of claim 1, further comprising:

providing the user with an opportunity to specify display settings for displaying the personalized schedule information.

35. (New) The method of claim 1, further comprising:

maintaining a history of user preferences based on the information specified by the user.

36. (New) The method of claim 35, further comprising:

providing the user with reminders based on the history of user preferences.

37. (New) The system of claim 12, further comprising:

means for providing the user with an opportunity to specify display settings for displaying the personalized schedule information.

38. (New) The system of claim 12, further comprising:

means for maintaining a history of user preferences based on the information specified by the user.

39. (New) The method of claim 38, further comprising:

means for providing the user with reminders based on the history of user preferences.

40. (New) The system of claim 23, wherein the multimedia system is further configured to provide the

user with an opportunity to specify display settings for displaying the personalized schedule information.

41. (New) The system of claim 23, wherein the multimedia system is further configured to maintain a history of user preferences based on the information specified by the user.

42. (New) The system of claim 41, wherein the multimedia system is further configured to provide the user with reminders based on the history of user preferences.
